Dear Sir

WATER SAMPLE FOR ANALYSIS – PIGEON ROCK

Enclosed are the results of an analysis of water taken from the Pigeon Rock community water supply on 9 April 2015.

The sample was collected from the outside tap at 124 Cornish Point Road and was labelled as "Pigeon Rock CRO-004".

Water is sourced from the Pigeon Rock Bore.

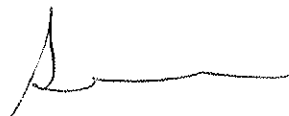

Bacteriological Test

The sample had an **E.coli count <1 1MPN /100mls**. The result indicated that the supply was of satisfactory bacteriological standard for drinking water at the time of collection.

Please find enclosed a copy of the test results for your information and an invoice for payment relative to cost of collection and testing of samples.

If you have any further enquires, please do not hesitate to contact the undersigned.

Yours faithfully

Sue de Jong
Administration Officer, Planning & Environment

Sample Type: Aqueous	
Sample Name:	Pigeon Rock CRO - 004 08-Apr-2015 11:50 am
Lab Number:	1409613.3
Escherichia coli	MPN / 100mL < 1

SUMMARY OF METHODS

The following table(s) gives a brief description of the methods used to conduct the analyses for this job. The detection limits given below are those attainable in a relatively clean matrix. Detection limits may be higher for individual samples should insufficient sample be available, or if the matrix requires that dilutions be performed during analysis.

Sample Type: Aqueous			
Test	Method Description	Default Detection Limit	Sample No
Escherichia coli	MPN count using Colilert (Incubated at 35°C for 24 hours), or Colilert 18 (Incubated at 35°C for 18 hours), Analysed at Hill Laboratories - Microbiology; 101c Waterloo Road, Hornby, Christchurch. APHA 9223 B, 22 nd ed. 2012, MIMM 11.A1.1, LAS Official test 1.1.1, 1.8.	1 MPN / 100mL	

These samples were collected by yourselves (or your agent) and analysed as received at the laboratory.

Samples are held at the laboratory after reporting for a length of time depending on the preservation used and the stability of the analytes being tested. Once the storage period is completed the samples are discarded unless otherwise advised by the client.

This report must not be reproduced, except in full, without the written consent of the signatory.

Lisa McCabe NDS
Laboratory Technician - Microbiology

This Laboratory is accredited by International Accreditation New Zealand (IANZ), which represents New Zealand in the International Laboratory Accreditation Cooperation (ILAC). Through the ILAC Mutual Recognition Arrangement (ILAC-MRA) this accreditation is internationally recognised.

The tests reported herein have been performed in accordance with the terms of accreditation, with the exception of tests marked *, which are not accredited.
